## ABOUT ME

A Diploma Information Technology student seeking an internship to gain practical experience and expand my skills. I have high motivation for technologies and enjoy exploring new technologies, website design, programming language, and software application. I am very interested in programming and some experience on building a computer.

With my academic background and hands-on experience in various assignment projects, I possess strong analytical and problem-solving skills, attention to detail, and an eagerness to learn. I am confident that an internship will provide me with the opportunities to apply my theoretical knowledge to real-world scenarios, enhance my technical skills.

My strengths:

- Creative Thinking
- Strong interpersonal
- Strong communication skills
- Responsibility
- Team work
